PREFACE AND TABLE OF CONTENTS FROM  
"RADIO COMMUNICATION"

## PREFACE

The book Radio Communication (Radiovyaz) by M. V. Amalitskiy, Sh. I. Girshgorn, M. N. Kalantarov, and K. A. Shechutskoy has been authorized as a textbook for communications schools by the Department of Scientific Institutions, Ministry of Communications USSR.

It is based on a course given by the authors at the Moscow Polytechnic School of Communications imeni Podbel'skiy and is intended as an elementary textbook to familiarize students in the wired communications departments of communications schools with the fundamentals of radio engineering. It may also serve as an intermediate course for operators of wired radio installations.

## TABLE OF CONTENTS

	Page
Preface	3
Chapter 1. Introduction	
1. Short History of the Development of Radio Engineering	5
2. Radio in the Soviet Union	10
3. Principles of Modern Radio Communication	13
4. Analysis of Amplitude Modulation	18
5. Frequency Modulation	23
6. Applications of Radio Engineering	26

	<u>Page</u>
Chapter 2. Electric Oscillations in Circuits With Lumped Constants	
1. Free Electric Oscillations in Single Circuits	29
2. Damping Factor	33
3. Forced Oscillations in Series Circuits	35
4. Voltage Resonance	36
5. Resonance Curves. Circuit Pass Band	38
6. Forced Oscillations in Parallel Circuits	41
7. Current Resonance	43
8. Circuits of Types II and III	46
9. Power to Be Delivered in a Parallel Circuit	47
10. Forced Oscillations in Connected Circuits	48
11. Elements of an Oscillatory Circuit	62
Chapter 3. Antennas	
1. Radiation of Radio Waves	69
2. The Antenna -- an Open Oscillatory Circuit	71
3. Long-Wave Antenna Control	74
4. Radiating Power of Antenna	76
5. Effective Height of Antenna	77
6. Ground	80
7. Half-Wave Dipole	81
8. Reflector	83
9. Operation of a Receiving Antenna. Theorem of Reversibility	84
10. Types of Antennas	86
Chapter 4. Propagation of Radio Waves	
1. Surface and Propagated Radio Waves	89
2. Structure of Atmosphere	89
3. Influence of the Ionosphere on Radio-Wave Propagation	91
4. Propagation of Long and Medium Waves	93
5. Propagation of Intermediate and Short Radio Waves	96
6. Propagation of Ultrashort Radio Waves	100
7. Application of Different Radio Wave Bands	102

<b>Chapter 5. Radio Transmitters</b>	
1. High Frequency Oscillators	104
2. Working Principles of a Vacuum-Tube Oscillator	105
3. Block Diagram of a Radio Transmitter	106
4. Supply Circuits for a Vacuum-Tube Oscillator	109
5. Operating Conditions of Vacuum-Tube Oscillators	112
6. Parallel Tube Connection. Push-Pull Circuit	119
7. Self-Excitation of Vacuum-Tube Oscillators	121
8. Neutralization of Vacuum-Tube Oscillators	123
9. Frequency Stabilization of an Oscillator With Self-Excitation	126
10. HF Oscillation Control. Radiotelegraphy	130
11. Amplitude Modulation of HF Oscillators	132
12. Grid Modulation Circuits	136
13. Plate Modulation Circuits	138
14. Frequency Modulation. FM Circuit	140
15. Short and Ultrashort Radio-Wave Oscillators	142
<b>Chapter 6. Radio Receiving Installations</b>	
1. General Information on Radio Receiving Installations	144
2. Main Requirements for Receiving Installations	147
3. Input Circuits	149
4. HF Amplifiers (Resonance Amplifiers)	153
5. Detection	157
6. Regeneration	164
7. LF Amplifiers	166
8. Frequency Conversion	172
9. IF Amplifiers	178
10. Advantages of Superheterodyne Over Direct (Tuned RF) Amplification Receivers	181
11. Interference and Its Elimination	182

Chapter 7. Broadcasting	
1. Broadcasting Systems	184
2. Broadcasting Studios	186
3. Insulating Studio Against Sound and Vibration	187
4. Studio Acoustics	188
A. Reverberation Phenomena	188
B. Acoustical Equipment of Studio	190
C. Variable Reverberation Installations	192
5. Microphones	193
A. The 1M-2 Microphone	194
B. The MK-3 Capacitor Microphone	195
C. Moving-Coil Microphones	197
D. Ribbon Microphones	198
E. Piezoelectric Microphones	201
6. Pickups	201
A. Electromagnetic Pickups	202
B. Piezoelectric Pickups	203
7. Equipment of Control Rooms	203
8. Transmission Lines for Wired Broadcasting	206
9. Loud-speakers	208
A. Electrodynamic Loud-speakers	
B. Electromagnetic Loud-speakers With Unrestricted Amplitude Oscillations	210
C. Piezoelectric Loud-speakers	212
Chapter 8. Television	
1. Method of Transmitting and Receiving Pictures	213
2. Quality of Pictures	215
3. Picture Transmitters	217
4. Picture Receivers	219
5. Television-Signal Frequency Band	222
